

SQL

Subqueries in WHERE clause

SQL: Subqueries in WHERE

```
Select A1, A2, ..., An  
From R1, R2, ..., Rm  
where condition ←
```

Expressions involving
“subqueries”: nested
select statements

Demo: simple college admissions database

College(cName, state, enrollment)

Student(sID, sName, GPA, sizeHS)

Apply(sID, cName, major, decision)
